Well to add my 2 cent to this, if I want to pay for this as part of my service I should have the right to get Traffic and weather, my thing is that yes I could easily tune to WTOP 1500 AM in DC and wait for the 8s, but with XM it al ready on no waiting, once im update with the T&w im back to my other programing, why is it that we the public have to tell government that we want on our program when we are the ones paying for it just like Directv.
